

S T E

L L

Quality, comfort, functionality, closeness... in short, Castrosua. The best materials, our professional processes, the permanent consulting service and the care we put in every detail, guaranty durability and resistance for our most demanding clients and toughest routes.

A E

QUALITY

Stability, toughness, resistance, adhesiveness... in short, safety. Castrosua, with over 60 years of experience in the sector, offers the most advanced and officially certified mechanisms in active and passive safety, to provide our clients the everyday tranquility they need.

SAFETY

Comfort, warmth, spaciousness, modernity... in short, ergonomics. We put cutting-edge electric and electronic mechanisms to the driver's service, designing a customized and welcoming working area, with all the conveniences within reach.

ERGONOMICS

At Castrosua, we are constantly betting on innovation, in our constructive processes and also in the machinery we use. The important investments we make in this regard, deliver a larger precision in the vehicle's assembly process, and therefore, in the final quality of it.

An example of this is our new tumbler, with which we can integrate the luggage storage compartment in the structure itself, making it more robust.

INNOVATION

Versatility, design, configurability, adaptability..., in short, customization. We always mould and define the product to fit your requirements, for your service.
